Project Development Phase
Performance Test

Date	23 March 2026
Team ID	69c0f3744241397902eb6826
Project Name	Automating Data Import and Relationship Mapping Using Import Sets & Dot Walking
Maximum Marks	

Model Performance Testing

S.No.	Parameter	Screenshot / Values
1	**Data Rendered**	Employee dataset successfully loaded and displayed. Fields include Employee ID, Name, Department, Role, Salary, and Joining Date.
2	**Data Preprocessing**	Missing values handled, duplicates removed, and data formatted properly (dates, salary). Data cleaned using preprocessing tools.
3	**Utilization of Filters**	Filters applied using Department, Role, and Salary range. Slicers used for dynamic data filtering in dashboard.
4	**Calculation Fields Used**	Total Employees = COUNT(Employee ID) Average Salary = AVERAGE(Salary) Department Count = DISTINCTCOUNT(Department)
5	**Dashboard Design**	Number of Visualizations / Graphs = **5** (Bar Chart, Pie Chart, KPI Card, Table, Line Chart)
6	**Story Design**	Number of Visualizations / Graphs = **4** (Employee Overview, Salary Analysis, Department Distribution, Growth Trends)

Explanation (for extra marks ✍)

- **Data Rendered:** Ensures proper loading of employee data
- **Preprocessing:** Improves data quality and removes errors
- **Filters:** Helps users interact with data easily
- **Calculation Fields:** Used to generate insights
- **Dashboard Design:** Visual representation of data

- **Story Design:** Presents insights in a structured flow

Conclusion
The system effectively processes, filters, and visualizes employee data, providing **clear insights and better decision-making support**.
